Professional Experience

Tactoria (Startup)

January 2026 – Present

Full-Stack Developer (Early-stage)

Montreal, QC

- Spearheading the development roadmap using **Agile/Jira**, ensuring rigorous sprint orchestration and a stable weekly deployment cadence for early-stage features.
- Architecting high-conversion **UX/UI** workflows and a scalable component library with **Next.js** to minimize user navigation friction.
- Ensuring code integrity by engineering automated **CI/CD** pipelines via **GitHub Actions**, effectively reducing production environment staging errors.

JobTrackAI (SaaS)

September 2025 – January 2026

Full-Stack Developer

Montreal, QC

- Architected a SaaS solution automating career tracking, utilizing **NLP & Gmail API** to categorize over **1,000 emails** per session in real-time.
- Enhanced UI responsiveness by **60%** via asynchronous state management with **React Query** and real-time **PostgreSQL** synchronization.
- Engineered a secure **Zero Trust** environment using **Supabase RLS** and **OAuth 2.0** protocols to guarantee complete user data privacy.
- Developed analytical dashboards with **Charts.js**, providing strategic insights through dynamic, real-time data visualization.

Café Sans Fil

May 2024 – August 2024

Mobile / Backend Developer

Montreal, QC

- Developed an inventory management ecosystem using **Flutter** and a secure **Node.js** REST API, increasing operational efficiency by **40%**.
- Hardened data security by implementing granular **JWT** authentication and robust password protection strategies using **bcrypt** hashing.
- Reduced backend response times by **25%** through **MongoDB** collection restructuring and critical field indexing.

Technical Projects

Unishop (E-commerce Marketplace) | *Java, JUnit, Maven*

January 2024 – May 2024

- Developed a scalable marketplace, achieving **95%** test coverage via **TDD** and maintaining strict separation of concerns through **MVC** architecture.

Intermodal Reservation System | *Java, JavaFX, UML*

September 2023 – December 2023

- Conceptualized a logistics platform (Air, Sea, Land) using a **3-tier** architecture and **8+ design patterns** for maximum modularity and maintainability.

How To Cook (Web Application) | *Next.js, TypeScript, MongoDB*

May 2023 – August 2023

- Developed a high-performance recipe-sharing platform focusing on **SEO** and **Next.js Server-Side Rendering (SSR)** for instant page loads.

Education

University of Montreal

Graduated: 2025

Bachelor of Science in Mathematics and Computer Science

Montreal, QC

- **GPA: 3.39/4.3** — Recipient of the DIRO Excellence Scholarship (Bourse d'excellence)
- Core Coursework: **Software Engineering**, Data Science, **Algorithms**, and **Machine Learning**.

Technical Skills

Languages: TypeScript, JavaScript (ES6+), Java, Python, SQL, Dart, HTML5/CSS3

Frameworks: React, Next.js, Tailwind CSS, Flutter, Node.js, Express.js, JavaFX

Tools & Cloud: PostgreSQL, MongoDB, Supabase, Docker, Git, CI/CD, Jira, Vercel
