SUMMARY

Full-Stack Developer active in production since 2024, specialized in **React / Next.js** and **Node.js / PostgreSQL**. Experienced in early-stage startup environments, I cover end-to-end technical architecture, from secure database design to the deployment of **CI/CD** pipelines. Seeking a role to contribute to both engineering and product.

PROFESSIONAL EXPERIENCE

- Full-Stack Developer** | Tactorelia (Startup) | Montreal, QC Jan. 2026 – Present
- Full-stack development with **Next.js 16**, **React 19**, **TypeScript**, **Tailwind CSS 4**; layered architecture (services, repositories), **Zod** validation, and structured logging (**Pino**).
 - Multi-role authentication with **Supabase SSR**, **Upstash Redis** rate limiting, and onboarding middleware.
 - Complex dashboards: multi-step onboarding flows, secure storage (**RLS**), document review queue.
- Mobile / Backend Developer** | Café Sans Fil | Montreal, QC May 2024 – August 2024
- Development of a **Flutter** mobile app and a **REST API Node.js** for inventory management.
 - Data security through **JWT** authentication and **bcrypt password hashing**.
 - Restructured the **MongoDB** architecture and indexed critical fields.

PROJECTS

- JobTrackAI — Next.js, React Query, PostgreSQL, Supabase, OpenAI API, OAuth 2.0** Sept. 2025 – Jan. 2026
- NLP** parsing engine (Gmail API) processing 1,000+ emails/session to automate job-application tracking.
 - Responsive UI through asynchronous state management with **React Query**.
 - Zero Trust architecture** with Supabase **Row Level Security (RLS)**.
- How To Cook — Next.js, TypeScript, MongoDB** 2024
- SEO and performance optimization via **SSR**, with continuous deployment on **Vercel**.
- Unishop — Java, JUnit, Maven** 2024
- E-commerce platform with extensive unit tests (**TDD**) and an **MVC architecture**.
- Multi-Transport Reservation System — Java, JavaFX, UML** 2024
- Integration of 3 design patterns (Strategy, Observer, Factory) within a 3-tier architecture.
